

South Wales and Cognition

In South Wales we are working closely with Cognition Associates with regards to faith and BAME community engagement, they have been employed by the Welsh Government with regards to information gathering and breaking down barriers etc within these communities.

Cognition are currently in the process of attempting to organise a large scale conference regarding the Islamic faith, Muslim culture and organ donation led by a world renowned Grand Mufti. Our future plans for collaboration are facilitating breakout sessions/workshops at the conference. The day itself is thought to be an excellent opportunity for us to go and explain the process of donation and work closely with the community and religious leaders to overcome any attitudinal, cultural or perceived religious barriers to donation etc.

Also, later this year and throughout 2015 there will be a series of BAME health events hosted across Wales that the South Wales Organ Donation Services Team will be linking in with.

For any additional information please feel free to contact me.
